Video Conferencing with the school's students – February 22, 2017

The IUJ had a very good activity and interactions with the students of Vidyashram International School, Jodhpur on 22nd February, 2017.   The Department of Computer Science , ITS organized and coordinated this video conferencing.

The purpose of this video conferencing was to bring awareness of students in the field of computer science with main focus on enhancing programming skills. Associate Dean of ITS, Prof A.K. Saini, along with the CSE faculty members: Prof. Amit Sharma and Prof. Rajesh Ranjan with ex-students of this school currently pursuing their B.Tech from ITS, Jaipur were present in the video-conferencing to solve the queries of students and to guide them in their future career. The administrative department and the Computer Science Teacher of the School were also present in it.

Students were curious to know about the paper like Computer Science in their Std. XI and Std. XII and how it will be beneficial for them in their future career prospective. The faculty members of ITS guided the students regarding the importance of Engineering courses in Today's Global world with main focus on computer Science and Engineering. It was also discussed with the students that programming skills are not only required only in Computer Engineering but also plays a very vital role in other branches of engineering. The Video Conferencing took almost 90 minutes and the students were quite enthusiastic throughout the interactions.
