A Report on webinar

A webinar has been conducted for the student of ITS on the date 29/03/2017. The Webinar was delivered by Mr. Avanish Raju, alumnus of ICFAI Tech School (ITS). Mr. Avanish worked with Google INC, USA, as well as in India as a Business Systems Integrator to Google. The goal of the webinar was to interact with the student and solved their queries regarding job opportunity. He guided the students for new technologies that are useful in present industries and these technologies could help them in their future career. He also answered the queries regarding benefits on programming languages like python Java etc. He talks about the concept or technique which is useful for the further study. At the end of this session he motivated to our student for betterment of their personality.

He delivered the presentations with energy and enthusiasm. The students were very happy as they reported to be satisfied in the program and hoped that such webinar are organized on regular basis in near future.
