Mr. Tarun Pokhriyal is an accomplished academician and pharmaceutical professional with over 12.5 years of diverse experience in research and teaching. Presently serving as Assistant Professor at the ICFAI School of Pharmaceutical Sciences, ICFAI University Jaipur.

He is actively engaged in undergraduate teaching and academic development. His primary areas of interest are pharmaceutics, novel drug delivery systems, particularly Nanostructured Lipid Carriers, Transdermal, and Buccal Drug Delivery Systems and pharmaceutical research methodologies. He emphasizes critical thinking and practical learning, equipping students with both technical competence and professional readiness.

In addition to his academic and research contributions, Mr. Pokhriyal is an inventor of a patent of Transdermal Gel of Echinacea and has actively participated and presented his work at numerous national conferences. He also possesses substantial experience in academic administration, examination management, and quality assurance processes, contributing effectively to the enhancement of pharmacy education standards.
