

Dr. Surbhi Jain
Ph.D.(CURAJ), M.Sc. (Chemistry),UGC-JRF
Assistant Professor (Chemistry)

Dr. Surbhi Jain, an Assistant Professor of Chemistry, is a UGC-JRF awardee with a Ph.D. from CURAJ and an M.Sc. in Chemistry. She has been a DST-INSPIRE fellow and has successfully cleared NET-JRF. Her research focuses on the development of novel copper-based therapeutic agents and their interactions with DNA. With multiple publications in international peer-reviewed journals, she contributes significantly to the field of medicinal chemistry. Her work aims to explore the potential of copper complexes in biomedical applications, particularly in drug development. She is committed to advancing research in inorganic chemistry and its impact on healthcare.
