

**Dr. Swadeep Shukla**

*Assistant Professor / BPTH., MPTh. (Neurological Physiotherapy)*

Dr. Swadeep Shukla is an Assistant Professor specializing in Neurological Physiotherapy, with a solid academic foundation and extensive clinical experience. He holds a Bachelor of Physiotherapy (BPTH.) and a Master of Physiotherapy (MPTh.) with a specialization in Neurological Physiotherapy. With over 3.5 years of combined teaching and clinical practice, Dr. Shukla has gained profound expertise in neurological rehabilitation, focusing on improving patient outcomes through evidence-based techniques.

In addition to his clinical work, Dr. Shukla is actively involved in research, having authored multiple research papers published in international journals. His research interests include grip strength and other key areas of neurological rehabilitation. Known for his empathetic, patient-centered approach, he combines a strong research orientation with a compassionate understanding of patient needs. Dr. Shukla's passion for teaching and continuous learning makes him a valuable asset to both the academic and clinical communities, where he strives to make a meaningful difference in the lives of his students and patients alike.
