THE OFFICIAL NEWSLETTER OF ICFAI UNIVERSITY, JAIPUR

THE ICFAI UNIVERSITY, JAIPUR

MESSAGE FROM PRESIDENT

Prof. (Dr.) H. P. Singh, VSM

"Challenges are what make life interesting. Overcoming them is what makes life meaningful."

The instant quote of Joshua. J Marine aptly captures the essence of what the University faced during the period Jun- Dec 2021. The extended period of online education continued till the month of August 2021 and then with the first year students joining in from 01 October, the University switched itself to the offline mode with State Government removing the COVID 19 restrictions partially.   As was expected the University rose to the occasion and met all the associated challenges squarely and a sense of cheer, enthusiasm & excitement was seen in abundance and once again the campus flung open to campus based activities, much to the cheer of budding students.

To capture the glimpses of activities during the last six months and present the highlights to the reader, the University has a quarterly Newsletter "Kshitij" . I am happy to see the new edition (7.0) of Kshitij which has encapsulated the essence of all the activities undertaken by the constituent three schools and the Administration department of the University in the period between Aug to Dec 2021 and will like to compliment the Editorial Team for a splendid job in collating and compiling the information and presenting the same in most elegant manner. I am sure the readers would find the magazine quite interesting and informative. Kudos to the Editorial team.

Best Wishes. Jai Hind.
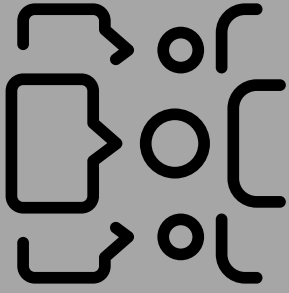

CONTENTS

EDITORIAL BOARD

Welcome

Prof. (Dr.) H. P. Singh, VSM

The ICFAI University, Jaipur welcomes Prof. (Dr.) H P Singh, VSM as the new President of the University and wishes him a successful tenure at the University.

" हार "

आज फिर हारे हैं दुनिया से,
पर ना मानेंगे हार खुदसे ||

लडना सिखा रहे हैं ये हालात हमारे,
कमजोर ना पढ़ेंगे हम जैसे इरादे तुम्हारे ||

आज़ गिर के कल फिर उठेंगे,
चाहे जहा जाना पड़े हर बुलन्दियो को छुएंगे ||

हार ना मानना परिंदे मेरे,
के फिर साथ चल पढेंगे ये सितारे तुम्हारे ||

आज हार को भी हार का स्वाद चखाएंगे,
हम गिरते संभलते भी आगे बढ़ते जाएंगे ||

हार से जो सिखा है,
उसे दोबारा ना दोहराएँगे
हम हर रंग से अपनी दुनिया सजाएँगे ||

FACULTY WRITE-UPS

Sustainable development "The key to new world"

The last few decades have brought a new roller coaster to the world, with new challenges and opportunities arriving in droves. Humanity's survival was put to the test. All of the events taught us about the importance of sustainability.

Let us first define sustainability and why it is so important today.

While the concept of sustainability is relatively new, it has roots in longstanding movements such as social justice, conservationism, internationalism, and others. By the end of the twentieth century, many of these ideas had coalesced into the call for 'sustainable development.'

The concept of sustainable development is to meet current needs without jeopardizing the needs of future generations. This is multifaceted, and it addresses the interdependence of the SDGs (Sustainable Development Goals), with the goal of improving our world. In 2015, the United Nations' 193 member states adopted the 2030 Agenda for Sustainable Development, which included the 17 Sustainable Development Goals (SDGs).

Since our ancient nation was the home of sages, philosophers, and scientists who advanced India in the fields of science and technology without harming the environment, we have always lived in a way that preserved the harmonious relationship between mankind and nature. There was a time when industrial development tipped the balance between climate and ecological biodiversity violently back and forth. Somehow, this resulted in an exodus of people concluding that this was the cause of global warming, which is the greatest threat to the human race.

To achieve economic and social development, the existing population can be channeled into various sectors. Providing education and employment will allow us to better utilize our human resources.

The 2030 Agenda for Sustainable Development was developed by the United Nations. This agenda serves as the foundation for the SDGs and sheds light on the global vision that we all share. The agenda's five dimensions are Prosperity, People, Planet, Peace, and Partnerships (The 5 P's). This is a bold, systems-level strategy to end extreme global hunger, inequality, and climate change by 2030. To address problems in a holistic and integrated manner, these actions must be carried out in collaboration with appropriate means of implementation.

India has made several distinct contributions to the global effort to achieve the Sustainable Development Goals. During India's freedom struggle, the Khadi, a hand spun fabric, was widely used. It is a fabric that has no negative environmental impact. According to the Ministry of Micro, Small, and Medium Enterprises, producing a meter of khadi fabric uses less than 6% of the water required to produce a meter of mill fabric. The "Khadi and Village Industries Commission" is working to promote the production and use of khadi, which will create jobs and significantly increase rural weavers' income.

Yoga is an ancient Indian practice that has gained a captivated global following in recent years. It teaches us how to maintain a peaceful mind and a healthy lifestyle. The Aparigraha instructs us to limit our consumption and donate to the poor and needy. Adherence to these principles and practices would strengthen our efforts to promote ideal consumption patterns.

To achieve sustainable development, all nations must collaborate. Developed countries with large carbon footprints must be more concerned and develop a comprehensive plan for green and sustainable growth. Nations must use resources responsibly in order to contribute to the reduction of global warming and resource depletion.

'If we take care of our planet, Our Planet will take care of us.'

Dr. Megha Pandey
Assistant Professor, IBS Jaipur

The Constitutional And Institutional Framework Of Human Rights In India

The constitution of India provides numerous rights which are called "fundamental rights. The expression "fundamental rights" denotes that these rights are inherent in all human beings and they are required for blossoming of the human personality and soul. These rights have been given a superior place of pride in the Constitution. These rights are therefore necessary to protect the dignity of individual and to create conditions in which a person can develop to the fullest extent. The judicially enforceable fundamental right which comprises all seminal civil and political rights and some of the rights of minorities are enshrined in part III of the Constitution (Articles 12 to 35). These include the right to equality, the right to freedom, the right against exploitation, the right to freedom of religion, cultural and educational rights and the right to Constitutional remedies. The Fundamental rights differ from ordinary rights in the sense that the former are uninfringeable. No law, ordinance, custom, usage, or administrative order can abridge or take them away. Any law, which is violating of any of the fundamental right, is void.

In *ADM Jabalpur v. Shukla*,[1] Justice Beg observed:

 "the object of making certain general aspects of rights fundamental is to guarantee them against illegal invasion of these rights by executive, legislative, or judicial organ of the State."

Earlier, Chief Justice SubbaRao in **Golak Nath v. State of Punjab**[2] had rightly observed, "Fundamental rights are the modern name for what have been traditionally known as natural rights." The Supreme Court of India recognizes these fundamental rights as 'Natural Rights' or 'Human Rights'. While referring to the fundamental rights contained in Part III of the Constitution, Sikri, the then Chief Justice of the Supreme Court, in **Keshavananda Bharati v. State of Kerala**,[3] observed:

"I am unable to hold these provisions to show that rights are not natural or inalienable rights. As a matter of fact India was a party to the Universal Declaration of Rights….and that Declaration describes some fundamental rights as inalienable."

Institutional Framework and Human Rights

India is divided into twenty nine[4] States and seven Union (centrally administered) territories. The Constitution provides for division of legislative functions between Parliament and the State Legislatures. **97** items are placed under Parliament, **66** items are allocated for State Legislatures and **47** are made subject to concurrent jurisdiction of both, with the power of Parliament overriding in case of overlapping legislation (Article 246 and the seventh Schedule of the Constitution). Parliament has power to make laws, inter lia, on preventive detention (Item 9. Union List, and item 3, Concurrent list), offences against laws in respect of any matter in the Union List (Item 93), and any matter not enumerated in any of the three lists (Item 97 and Article 248). Public order (Item I), prisons and reformatories (Item 3), relief to the disabled and the unemployed (Item 9), and industries other than those declared by Union Legislature to be controlled by the Union (Item 24) are among the items in the State List. The Police is a State subject (Item 2), whereas deployment of any armed forces of the Union or any other force under the control of the Union is in the Union List (Item 2-A). Criminal law and procedure (Items 1 and 2), preventive detention for reasons connected with the security of the State, the maintenance of public order, or the maintenance of essential supplies and services (Item 3), transfer of prisoners (Item 4), actionable wrongs, civil procedure (Item 13), economic and social planning (Item 20), labor matters (Items 22, 23 and 24), education (Item 25), and factories (Item 36) are in the Concurrent List. Further, Article 253 empowers parliament to make laws for implementation of any treaty, notwithstanding the above distribution of legislative powers.

A deep analysis of the Fundamental Rights and the Directive Principles make it amply clear that between Constitution and its implications, almost the entire field of the universal declaration of human rights are covered. Besides, the Indian Constitution, through these two parts (Part III and IV) has made a novel attempt to balance between enforceable rights and non-enforceable rights, allowing them to complement each other on the fundamental governance of the country. Finally, both these rights are inter- related and indispensable for the nourishment of others.

MORE THAN WORDS

STUDENTS' CORNER

" मेरी कलम "

मेरी कलम जब चलती
मार्मिक विषय तो कभी, खूब प्रेम बरसाती,
शब्दों की फुहारों संग, सच सब जज़्बात सजाती
मेरी कलम जब चलती !

कभी दर्द ए चित्कार लगाती,
कभी तन्हा रातों संग बतियाती,
कभी मेरे संग गुनगुनाती,
तो कभी आंसूओं को झलकाती,

मैं सिर्फ लिखती चली गई ,
ये दुनिया मेरी कलम की चित्कार सुन,
मुझे दर्द-ए-शायरा बुलाती
मेरी कलम जब चलती !

दो टूक शब्दों को, परमाणु सा विखंडित करके
मेरे बेश कीमती उसूलों के आगे,
मेरे जज्बातों को साथ रखके,
कागज पर कुछ भी उकेर देती,
मेरी कलम जब चलती !

कल्पना के घरोंदो को, अधूरे सपनों को,
किसी की यादों को , किसी की बातों को,
नींद के अतिक्रमण से पहले, बेपरवाह होकर,
स्याह रातों की घड़ियां बदलने तक,
मोतियों की तरह सुंदरता से पिरोकर रख देती,
मेरी कलम जब चलती !

मेरे उलझे लफ्जों को, कहराते दर्द को, बिखरे अल्फाजों को,
मेरे जुड़ते शब्दों के एहसासों को , मुझ जैसे बेपरवाह को,
सबको समेट के प्यार से संवार देती ,
मेरी कलम जब चलती !!

सच कहूं मेरी सच्ची सखी आज , सिर्फ मेरी कलम कहलाती।

MORE THAN WORDS

"DON'T ISOLATE"

We live in a world full of misery,
But no battle to be won alone is stacked in history.

Actions and words of people can hurt you sometimes
But shutting yourself in, will only dull your shine.

A few will have nothing to do with you,
Still, they will always try to take toll on you.

Thinking of them you might shut your gate,
And start to decay because you choose to isolate.

We all are happy and sad simultaneously here,
And all need someone to take their care.

Sometimes we need people around us to celebrate,
At other times to talk things that are delicate.

As we grow up and walk on our paths,
Most times we will fail at Life's Maths.

Our calculations about people won't go correct,
But our faith in humanity should still remain intact.

Go out, give your soul the relax it needs,
And sow some new friendship seeds.

Not everyone will be a reflection of your past,
Not everyone will leave you, some will last.

A WORLD WITH INDUSTRY 4.0

Providing MSME's with efficient and competitive technologies. A vision of the German Government towards making the processes of business and manufacturing reach soaring levels of automation, Industry 4.0, with the help of technologies like Additive manufacturing, cyber physical systems, Internet of things, cloud computing and cognitive computing would help industries make data- driven decisions, advanced algorithms would give an edge for analyzing data into real time decisions. A lot of countries are already in this phase, like USA, Canada, Japan, Germany, Australia, Austria and Switzerland.

Outstripping the challenges

As Micro, Small and Medium Enterprises (MSMEs) are growing to become India's backbone, they are more required to be included in the Fourth Industrial Revolution transition. According to India Brand Equity Foundation, there are 6.3 crores MSMEs in India and the Economic Survey 2020-2021 says that they employ over 11 crore people and contribute around 30% to India's GDP. Thus, MSMEs are becoming an important sector in building the economy and contributing to large employment. These statistics make it imperative to ensure that MSMEs get more inclusive growth. As a result of Industry 4.0, they will be capable of offering world-class products and being more efficient. However, with every opportunity comes a great challenge. Adopting such a growth comes with a lot of resistance and ambiguity. Apart from this there are challenges in the form of complete automation as physical jobs or routine work will decrease and the demand for highly skilled, flexible and problem- solving talent will increase. Also, there will be challenges in the form of digitalization, lack of standardization, data security, managing Big Data, etc.

Growth Prospects

Industry 4.0 will pave the way for MSMEs towards new opportunities through Industrial Internet of Things (IIoT), improving the existing systems and new technologies and a positive organizational culture. They require a proper framework to understand the technicalities of 4.0 and how will they envision this with the help of relevant practices. As India entered the list of top 50 countries in the Global Innovation Index by securing the 46th rank, MSMEs should now be sensitized by different institutions about the benefits of Industry 4.0 which will serve in promoting efficiency and serving world-class products to customers. MSMEs need to acknowledge the positive changes that Industry 4.0 technologies could bring, making them competitive, flexible and helping them expand their horizon.

SPACE PEREGRINATION (A WALK INTO THE UNIVERSE)

One thing us as humans have never been able to fully understand is astronomy. Always having an unexplained mystery, astronomy also has served as a way to keep time and predict the future. The word "astronomy" is defined as the study of heavenly bodies, meaning anything in the sky such as stars, galaxies, comets, planets, nebulae, and so on. Many people, if not everyone, is amazed by the night sky on a clear, moonless night.

Astronomy dates back to ancient times when peoples such as the Babylonians, Egyptians, and Chinese kept written records of astronomical events and occurrences. Today's seven-day week originates from the Babylonians' seven important bodies in the night sky: the Sun, Moon, Mars, Mercury.

A wide array of instruments is used to observe heavenly bodies today. These instruments include optical telescopes which are used to magnify objects that emit visible light. Some celestial bodies are very difficult or impossible to see with optical telescopes. To see these, we use radio, X-ray, ultraviolet, or infrared instruments. An advantage of radio astronomy is the fact that radio waves aren't stopped by the sun or clouds, therefore the stars can be observed at any time.

Astronomy has always been a mind-blowing factor of our existence. However, it's not just humans doing all the work, it also the instruments. One of the instruments would be telescopes. There are many different telescopes used in astronomy, most of which are massive, and have special qualities.

Although they all have great features and are well working instruments, they need innovations sometimes. Over the years they have discovered mind boggling objects, and they are still looking. If we move our perspective to cosmology our real parents are stars, neutrons, electron these are the main reason behind the shape of humans we're today.

SUPREME COURT'S SUO-MOTU COGNIZANCE OF MIGRANT CRISIS OF 2020

INTRODUCTION

The eye of the faith is always kept on Judiciary by the people and the same is restored by this organ of the state when a three-judge Bench of the Supreme Court on May 26 took Suo motu insight of the "issues and tragedies" looked by migrants following the nationwide lockdown pronounced on March 22, 2020, to curb the corona outbreak and said there have been "insufficiencies and certain lapses" with respect to the Central and State governments to deal with the migrant crisis during the lockdown. The court issued an order to the Center and the States to promptly provide transport, food and haven liberated from cost to the stranded migrant workers.

The suo motu cognizance of media reports and portrayals from senior lawyers or dignitaries from legal fraternity to step in to protect the fundamental rights of the migrant workers was taken into consideration by the judges in their chambers. The bench has sought for a nitty gritty report from the Center, states and union territories to take up the issue for hearing and issue directions.

SIGNIFICANCE OF THIS DEVELOPMENT

The development drawn by the Apex court in form of the suo-motu cognizance in migrants' issue is remarkable which once again has affirmed that the Judiciary has a constant watch over the functioning of the govt. and could interfere validly for the well-being of the countrymen. This move of the Apex court was the hour of the need in order to protect the human rights of the migrants who were in critical situation and were not being aided by the govt. in cogent ways at all.

The suo-motu cognizance of the SC is significant to protect rights of the citizens and especially of the underprivileged class of people. This act of SC would surely put the govt. in an obligation to take necessary steps to provide transportation, food and other essentials to the migrants.

REASONING

SC has a focal duty to safeguards fundamental rights of the citizens of the country. migrants who were in the critical needy situation amidst the corona outbreak and country lockdown need to be aided by the union or state govt by taking necessary steps per contra no cogent steps were taken by the govt, which was sheer violation of their fundamental rights i.e. right to food. Although the Government of India and state governments have taken measures yet there have been inadequacies and certain lapses, as stated in the order passed by the Apex court in the said matter.

CONCLUSION

"Judges cannot sit in an ivory lavish tower and be blindfolded to the miseries of the citizens of India"

In the present situation of lockdown in the entire country, this section of the society needs succour and aid by the concerned Governments especially crucial steps need to be taken by the Government of India, State Governments/Union Territories in this critical situation to extend helping hand to these migrant labourers. The SC also received several letters and representations from different sections of society marking the critical issue of migrant labourers. The crises of migrant labourers are even persisting today with large sections still stranded on roads, highways, railway stations and State borders as acknowledged by the SC in its order.

In today's times, the judicial activism is the need of the hour to maintain the check and balance over the other organs of the state. The judiciary in the present scenario has led down a significant move by issuing the order to the union and state governments to provide essentials i.e. food, transports etc. to the migrant laboureres. But the moves by the courts in such emergent situations must be expedient and more quench as justice delayed is justice denied.
